Alexander Vasilenko

Full stack web developer & Information systems analyst

About me

I am Alexander. A Full stack web developer, and an Information systems analyst looking for a challenging position to develop professionally and grow personally.

Eager to learn new skills, work with new technologies, take on extra responsibilities, set personal and professional goals, and surpass them.

Autodidact, motivated, disciplined, and devoted with strong organizational skills and great capabilities in interpersonal relationships. Able to take initiative and lead when needed.

A Confident public speaker with solid presentation skills and great expressiveness.

A great team player who brings 2 years of experience in system analysis and project management to the table in addition to 2 years of experience as a web developer.
